TRENDS IN
GENETICS

REFERENCE EDITION

Volume 1

1985

CONTENTS

JANUARY

Monitor
Heterochronic mutations of *Caenorhabditis elegans:* Their developmental and evolutionary significance, *by Cynthia J. Kenyon* 2
The elusive testis-determining factor, *by J. Wolfe and P. N. Goodfellow* 3
Cell-free replication of SV40, *by Daniel Linzer* 4
Ethylnitrosourea as a mouse mutagen, *by J. Peters* 5

Technical Tips 6

Reviews
Artificial chromosomes in yeast, *by Elizabeth H. Blackburn* 8
The surface of the sea urchin embryo at gastrulation: a molecular mosaic, *by David R, McClay and Gary M. Wessel* 12
Virus expression as a probe of regulatory events in early mouse embryogenesis, *by Merilyn J. Sleigh* 17
Anti-sense RNA as a molecular tool for genetic analysis, *by Harold Weintraub, Jonathan G. Izant and Richard M. Harland* 22
Protein machines mediate the basic genetic processes, *by Bruce M. Alberts* 26
Activation of heat-shock genes in eukaryotes, *by Hugh Pelham* 31

Book Review
Positional controls in plant development (P. W. Barlow and D. J. Carr) *by A. J. Trewavas* 35

FEBRUARY

Monitor
Middle repetitive DNA: amplification, homogeneity and mobility, *by Nick Hastie* 37
Direct gene transfer to plants, *by Christopher Howe* 38
Mitochondrial DNA and house mouse speciation, *by Grahame Bulfield* 39

Technical Tips 40

Reviews
The timing of early developmental events in *Xenopus, by M. Kirschner, J. Newport and J. Gerhart* 41
Structural and functional aspects of the mammalian homeo-box sequences, *by Frank H. Ruddle, Charles P. Hart and William McGinnis* 48
Cell cycle control genes in yeast, *by Paul Nurse* 51
Snakes and the evolution of sex chromosomes, *by K. W. Jones and L. Singh* 55

Book Reviews
Experiments with Gene Fusions (T. J. Silhavy, M. L. Berman and L. W. Enquist) *by Benno Müller-Hill* 61
Genetics and Development (James H. Sang) *by Roy J. Britten* 62

MARCH

Monitor
Chromosomal translocations and the c-*myc* gene: paradigm lost? *by Nick Gough* 63
RNA-mediated gene conversion? *by W. Ford Doolittle* 64

Technical Tips 65

Perspectives
How is the mouse segmented? *by Brigid Hogan, Peter Holland and Paul Schofield* 67

Reviews
Molecules and puzzles from the antennapedia homoeotic gene complex of *Drosophila, by Matthew P. Scott* 74
Nonreciprocal exchanges in the yeast mitochondrial genome, *by Ronald A. Butow* 81
Males, hermaphrodites and females: sex determination in *Caenorhabditis elegans, by Jonathan Hodgkin* 85
DNA methylation in extraembryonic lineages of mammals, *by Janet P. Sanford, Verne M. Chapman and Janet Rossant* 89

Book Reviews
Amphibian Morphogenesis (Harold Fox) *by J. B. Gurdon* 94
Biological Regulation and Development, Vol. 3B. Hormone Action (Robert F. Goldberger and Keith R. Yamamoto) *by M. Beato* 94
Genetic Maps 1984: A Compilation of Linkage and Restriction Maps of Genetically Studied Organisms. Vol. 3. (Stephen J. O'Brien) *by H. R. Nash* 94
DNA Repair and its Inhibition (A. Collins, R. T. Johnson and C. S. Downes) *by Phillip M. Achey* 95

APRIL

Monitor
New hypervariable DNA markers for mapping human genetic disease, *by Kay E. Davies* 97
Pleiotropic action of the adenovirus E1A proteins, *by Paolo Sassone-Corsi* 98

Technical Tips 99

Reviews
The *T/t* complex of the mouse, *by A.-M. Frischauf* 100
Retinoids and the control of pattern in limb development and regeneration, *by Malcolm Maden* 103
The enigma of the fragile X chromosome, *by Grant R. Sutherland* 108
The regulation of the bithorax complex, *by Philip Ingham* 112
Mitochondrial genes in trypanosomes, *by Rob Benne* 117

Book Review
Advanced Molecular Genetics (Alfred Puhler and Kenneth N. Timmis) *by J. M. Coffin* 122

MAY

Monitor
Etiology and mechanisms of aneuploidy, *by H. John Evans* 123
Methylation and expression of a housekeeping gene, *by Chiara Mondello and Peter N. Goodfellow* 124
Extragenic contribution of sperm to early development? *by Steve Prentis* 125

Technical Tips 127

Reviews
Mouse monosomies and trisomies as experimental systems for studying mammalian aneuploidy, *by Charles J. Epstein* 129
Mitochondrial inheritance in mice, *by Kirsten Fischer Lindahl* 135

The search for mitochondrial inheritance of human diseases, *by Carl R. Merril and Michael G. Harrington* 140
Genetics of complement, *by P. J. Lachmann and M. J. Hobart* 145

Retrospectives
Thomas Hunt Morgan: Materialism and experimentalism in the development of modern genetics, Part 1, *by Garland E. Allen* 151

Book Reviews
Crop Genetic Resources: Conservation & Evaluation (J. H. W. Holden and J. T. Williams) *by G. Jenkins* 153
Cancer cells, Vol. 2, Oncogenes and Viral Genes (G. F. Vande Woude, A. J. Levine, W. C. Topp and J. D. Watson), *by T. H. Rabbitts)* 155

JUNE

Monitor
Functional aspects of mouse homeo-domains, *by Paolo Sassone-Corsi* 157

Technical Tips 158

Perspectives
Dispensable genes, *by Susumu Ohno* 160
On the life strategies of plants and animals, *by Virginia Walbot* 165

Reviews
The dilute–short ear *(d–se)* complex of the mouse: lessons from a fancy mutation, *by Eugene M. Rinchik, Liane B. Russell, Neal G. Copeland and Nancy A. Jenkins* 170
DNA sequence polymorphisms revitalize linkage approaches in human genetics, *by Ray White* 177
Segregation distortion in *Drosophila, by L. Sandler and Kent Golic* 181

Retrospectives
Thomas Hunt Morgan: Materialism and experimentalism in the development of modern genetics, Part 2, *by Garland E. Allen* 186

Book Review
Mechanisms of Morphological Evolution: A Combined Genetic Developmental and Ecological Approach (Wallace Arthur) *by A. García-Bellido* 191

JULY

Monitor
Detecting carriers of muscular dystrophies, *by Jan Witkowski* 193
Disorders of growth hormone action, *by William H. Daughaday* 194

Technical Tips 195

Perspectives
Immortal genes, *by Susumu Ohno* 196

Reviews
Small cytoplasmic ribonucleoproteins, *by Sandra L. Wolin* 201
The Duchenne dystrophy gene: a Great Leap Forward on the Long March, *by Laurence H. Kedes* 205
Sex determination in *Drosophila, by Rolf Nöthiger and Monica Steinmann-Zwicky* 209

Book Review
Cell and Tissue Regeneration: A Biochemical Approach, *by L. Jaenicke* 215

AUGUST

Monitor
Chloroplast transformation by *Agrobacterium tumefaciens, by C. J. Howe* 217
Mapping mammalian chromosomes: new technolgies for old problems, *by S. D. M. Brown* 218
Nonsense suppression by mutants of elongation factor EF-Tu, *by R. H. Buckingham* 219

Technical Tips 220

Genetics online
The Protein Identification Resource and its applications, *by H. R. Chen and W. C. Barker* 221

Reviews
Enhancers and eukaryotic gene transcription, *by Edgar Serfling, Maria Jasin and Walter Schaffner* 224
Immunoglobulin genes in transgenic mice, *by Frederick W. Alt, T. Keith Blackwell and George D. Yancopoulos* 231
The domestic cat in genetic research, *by Roy Robinson* 236

Book Reviews
Plant Molecular Biology (Tertiary Level Biology) (Donald Green and Simon N. Covey), *by J. C. Gray* 240
Developmental Control in Animals and Plants (2nd edn) (C. F. Graham and P. F. Wareing), *by C. C. Wylie* 240

SEPTEMBER

Monitor
The molecular biology of development at Cold Spring Harbor
Drosophila, by Matthew Scott and Sean B. Carroll 241
Mammals, *by Keith Willison* 242
Nematodes, *by Jonathan Hodgkin* 243
Amphibians, *by Chris Wylie* 243
Yeast, *by Steven Reed* 244

Technical Tips 244

Reviews
Trends in oncogenes, *by J. Michael Bishop* 245
The mechanism and control of P element transposition in *Drosophila melanogaster, by Kevin O'Hare* 250
Visualizing transcription in chromosomes, *by Barbara A. Hamkalo* 255
The molecular biology of the antigen-specific T cell receptor, *by Susan John and Michael J. Owen* 261

Book Reviews
Microbial Development (Richard Losick and Lucy Shapiro), *by Patrick J. Piggot* 265
Gene Cloning: The Mechanics of DNA Manipulation (David M. Glover), *by J. S. Emtage* 265

OCTOBER

Monitor
Tissue-specific expression of immunoglobulin genes: a reappraisal, *by Nick Gough* 267
Archaebacteria coming of age, *by W. Ford Doolittle* 268
A single protein that binds to enhancers, promoters and replication origins?, *by William S. Dynan* 269

Reviews
Amplification of N-*myc* in human neuroblastomas, *by Manfred Schwab* 271
Genetics of steroid 21-hydroxylase deficiency, *by Phyllis W. Speiser and Maria I. New* 275
Adenosine deaminase deficiency and severe combined immunodeficiences, *by Rodney E. Kellems, Cho-Yau Yeung and Diane E. Ingolia* 278
Genetics of reovirus virulence, *by Bernard N. Field* 284

Book Reviews
Principles of Gene Manipulation: an Introduction to Genetic Engineering (R. W. Old and S. B. Primrose) *by S. J. W. Busby* 287
Introduction to Genetic Toxicology (J. Moutschen) *by H. John Evans* 287
Programmes for Development: Genes, Chromosomes and Computer Models in Developmental Biology (*J. Embryol. Exp. Morphol.* 83, Suppl.) (Alma Swan, Herbert Macgregor and Robert Ransom) *by George M. Malacinski* 288

NOVEMBER

Monitor
The pseudoautosomal region and telomeres: the beginning of the end?, *by C. Pritchard and P. N. Goodfellow* 289
RNA transcription and DNA synthesis at origins of DNA replication, *by Phillip Nagley* 290
High-rise labyrinth of developmental biology, *by Lewis Wolpert* 291
Homologous recombination in human cells, *by Daniel Linzer* 292

Technical Tips 294

Perspectives
Heredity without genes: ciliate explorations of clonal heredity, *by David L. Nanney* 295
The erratic career of cytoplasmic inheritance, *by Jonathan Harwood* 298

Review
Developmentally regulated gene amplification, *by Fotis C. Kafatos, William Orr and Christos Delidakis* 301
Oncogenes encoding protein kinases, *by Bartholomew M. Sefton* 306
Molecular biology of phenylalanine hydroxylase and phenylketonuria, *by Fred D. Ledley, Anthony G. DiLella and Savio L. C. Woo* 309

Book Review
Genetics and Neurology (Sarah Bundey) and Genetics in Neurology (Victor Ionasescu and Hans Zellweger) *by P. K. Thomas* 314

DECEMBER

Monitor
Map, dictionary and directory of the human genome: reliable knowledge for research and counselling, *by Charles R. Scriver* 315

Technical tips 316

Reviews
Cell differentiation in *Caulobacter, by Lucille Shapiro* 317
Genetics and biology of mouse melanocytes: mutation, migration and interaction, *by Ian J. Jackson* 321
The c-*myc* proto-oncogene: involvement in chromosomal abnormalities, *by T. H. Rabbits* 327
The transmission and activation of endogenous mouse retroviral genomes, *by Christine Kozak and Jonathan Silver* 331
Mutations that impair androgen action, *by Jean D. Wilson and James E. Griffin* 335

Book review
Mammalian Cell Genetics (Cell Biology Series, Vol. 4) (Martin L. Hooper), *by H. Galjaard* 340
